

HEURISTIC EVALUATION WORKBOOK

Nielsen Norman Group - Jakob's 10 Usability Heuristics

Evaluator: Princess B. Lodor
Date: May 08, 2026
Product: QuickBite (Food Ordering and Delivery App)
Task: Navigation and Food Ordering

Heuristic 1: Visibility of System Status

Issues	Recommendations
None	No action needed

Heuristic 2: Match Between System and the Real World

Issues	Recommendations
None	No action needed

Heuristic 3: User Control and Freedom

Issues	Recommendations
Some students mentioned that while using the Search feature, they wanted a faster way to delete their typing to start a new search.	➤ Add a small "X" or "Clear" icon inside the search bar for quick corrections.

Heuristic 4: Consistency and Standards

Issues	Recommendations
The "Buy Now" button uses a slightly different shade of orange compared to the "Add to Cart" button.	➤ Match the color and style of all primary action buttons to maintain a unified look.

Heuristic 5: Error Prevention

Issues	Recommendations
None	No action needed

Heuristic 6: Recognition Rather Than Recall

Issues	Recommendations
None	No action needed

Heuristic 7: Flexibility and Efficiency of Use

Issues	Recommendations
Students noted that horizontal scrolling for food categories could be more obvious.	► Add a slight shadow or "peek" effect at the edge of category chips to show that more items are scrollable.

Heuristic 8: Aesthetic and Minimalist Design

Issues	Recommendations
None	No action needed

Heuristic 9: Help Users Recognize, Diagnose, and Recover from Errors

Issues	Recommendations
None	No action needed

Heuristic 10: Help and Documentation

Issues	Recommendations
None	No action needed
